

## MÚSICA COMERCIAL

by EINTOTEN (free Arts Lab Collective)

Thanks for your attention!

This is not just commercial music, it's a collection of 7 tracks portraying the most refreshing European urban music. *Urban music* sounds scary, but don't be afraid! As we understand it in the collective, we refer as *Urban music* to the vast legacy of European classical-folk-music of the last century, and the modernist continuity influenced by the legacy of the movement called Krautrock (1950-1980)

Due to Covid-19 hardtimes, and with all the support from the WUVSAC (China's Wuhan Vegan Society Arts Center), we cannot perform or record physically.

So, we used tele-work, using cloud file sharing and other tricks we could perform and record, within a 8 people team across the distance.

All tracks composed, performed and recorded by members of the EINTOTEN free arts lab collective.
